Boom Pumps

Telebelts®

The Pro-Tech Certified Pre-Owned Equipment Center exists to extend Putzmeister's unwavering commitment to quality concrete and material placing equipment and product support to the pre-owned market.

Offering both competitive prices and the assurance of buying from the manufacturer, Pro-Tech has the capabilities to restore the company's original truck-mounted concrete boom pumps, Telebelts® and trailer-mounted concrete pumps to factory standards for years of reliable and efficient performance. The facility is staffed by a team of professional technicians who know every Putzmeister machine, inside and out.

From "as is" units to those renewed from the ground up, Pro-Tech provides just what your needs demand. Best of all, it's a Putzmeister with all the quality and performance features you expect from our company.

While the Pro-Tech Center refurbishes the full line of products that Putzmeister manufactures, boom pumps and Telebelts benefit from a tiered system. Customers can choose from Putzmeister's inventory of pre-owned equipment at a refurbished level that meets their needs and budget. Only Certified Pro-Tech boom pumps and Telebelts receive Putzmeister's stamp of approval.

Pro-Tech Web Site: Find Your Pre-Owned Equipment Online

The Pro-Tech web site is designed to provide a more personalized way of locating a piece of used equipment. The web site features an easy-to-use 'Equipment Finder,' an interactive feature which allows visitors to customize their search for used equipment by type, brand, stock number, model, year range and model class. To view Pro-Tech's web site and learn more, visit: www.pmaprotech.com.

PRO-TECH

Certified Pre-Owned Equipment

10

The PRO-TECH program includes three tiers of service to accommodate your specific needs:
