

## Survival of the Fittest...

To survive a potential service dilemma in the field, here's a list of key parts you may find beneficial to carry on board your Telebelt®. Having these vital necessities on hand can help solve most minor field service problems that can be repaired in under 30 minutes. Plus, these parts can be conveniently stored in the unit's tool box so they're available whenever needed.

*Note: the list below applies to all Telebelt TB 80, 110 and 130 models unless specially noted, and most can be ordered via the Putzmeister Parts Department at (800) 890-0269.*

\*Multi-Meter

\*Jumper Leads with Alligator Clips

\*Not available from Putzmeister; however, RadioShack® offers these two items above.

# Order a **FREE** **Telebelt®** **QuickStart Series** **DVD today.**

*Orders accepted until April 14, 2006.*

Offering customers more than equipment in terms of service and support, Putzmeister America recently developed a new and updated DVD version of the popular Telebelt® QuickStart series.

Designed as a fast and convenient reference for the more *visual aspects* of our truck-mounted telescopic conveyors, the QuickStart series is a guide to setup, operation and maintenance of Telebelts.

The informative DVD specifically covers models TB 80, TB 110 and TB 130. It also addresses setup for units configured on both Mack and Sterling chassis.

As a result, viewers can select from the setup menu and watch the most accurate instructions for their particular model(s).

Throughout the highly instructive presentation, Putzmeister's Field Service Technician Don Matthews takes viewers through a typical start up of a Telebelt, highlighting the importance of proper equipment setup, cleanup and maintenance. Don also provides operational tips for first time users.

As the informative DVD is designed to visually *supplement* the operators manual, Telebelt owners should still thoroughly read and rely on

their machine manuals prior to unit operation.

Note: the DVD is a multi-regional/NTSC video format, which can run on computers equipped with a DVD-ROM drive or on a traditional DVD player with television. Computer system requirements are listed on the faceplate of the DVD.

The new DVD is being included in the ship-away kit of all Telebelt models delivered after February 2006. It can also be ordered on a complimentary basis via the form below. Requests should be faxed to the Putzmeister America Marketing Department by April 14, 2006.
